Lavanila Vanilla Coconut Body Butter

Mickey says: "Lavanila believes what goes on your skin goes in your skin. Scary thought, but something to consider when you slather on your old chemical rich body cream. I've always been a fan of the toxin-free approach of the Lavanila grapefruit blend and, trust me, I am not a vanilla scent lover. When I was sent the coconut inspired scent I was a little apprehensive. The more we tested it the more it grew on me. Our models loved it and I have to say once you lather up in the body butter, your mind goes tropical."

Escape with Vanilla Coconut filled with an indulgent blend of young coconut, hints of monoi Tiare (a Tahitian white flower), and a warm sensual base of Madagascar vanilla bean. You'll instantly be transported to an island of healthy delights.

Bath & Body Works Enchanted Orchid

Mickey says: "With over 25,000+ orchid species, you can bet one is blooming up somewhere and making its surroundings smell fragrant. Bath & Body Works has actually trapped this exotic scent at its prime with Enchanted Orchid. It sprays a bit strong at first but evaporates into a soft, precious true orchid in a flash. Think along the lines of an orchid whisper."

Rare calypso orchids are enhanced by violets and white irises, then expertly counterpointed by master perfumers with fresh gardenia and amber musk. Sultry. Intriguing. Hypnotic.
